

Please reject NAB's Petition 04-160. I pay for satellite radio for one reason, I can not stand all of the commercials on over the air radio. If satellite radio can give me more for what I pay for, I am a happy consumer. It is not my problem that over the air radio stations can not make it. I listen to the radio for music and not contests. Also if you feel that satellite radio is unfair, then you should also consider removal of satellite TV and Internet, along with GPS and a score of other communications they offer. Satellite radio is giving the consumers what they want and should not be restricted because a few people are not happy.
